Title: THE ROLE OF INSURANCE CLAIMS DATABASES IN DRUG -THERAPY OUTCOMES RESEARCH

Abstract: The use of insurance claims databases in drug therapy outcomes research holds great promise as a cost-effective alternative to Post-marketing clinical...

...cohorts of patients and specific patient subpopulations. However, there are limitations to the use of insurance claims databases including incomplete diagnostic and provider identification data. The characteristics of the population included in the insurance plan, the plan benefit design, and the variables of the database itself can influence the research results. Given the current concerns regarding the completeness of insurance claims databases, and the validity of their data, outcomes research usually requires original data to...
